

Model 236

50kHz to 200kHz

A wedge shaped transom mount transducer that can be located below the hull line. This is particularly desirable to avoid the flow of turbulent water created by rivet heads on aluminum boats. Also recommended if deadrise is to great for flush mounted transducer (Model 231). Made of ABS high impact plastic.

Utilizing the different orderable options for the 236, it may be configured in any combination of depth, depth/temperature or depth/temperature/speed.

Options:

- Temperature sensor
- Speed sensor
- Dual frequency, single element, 50/200kHz
- Dual beam (degrees):
 - 14 & 38 @ 120 kHz
 - 11 & 20 @ 160 kHz
 - 9 & 19 @ 200 kHz

Applications:

- Excellent high speed performance.
- Inboard, Outboard, or jet boats.
- Safe with all types of hull material.

Specifications:

- Speed Sensor
 - Linearity is plus/minus 3% over speed range.
 - 3 pulses per revolution or 22,500 pulses per nautical mile.
- Temperature
 - Type: Thermistor.
 - Value: 10k ohms at 25C.
- Weight: 1 lbs.
- Material: High impact ABS plastic.

Performance Data

FREQUENCY (kHz)	BEAM WIDTH (degrees @ -3db)	ELEMENT SIZE (inches)	CAPACITANCE (pf)	IMPEDANCE (ohms)	TRANSMIT RESPONSE (db)	RECEIVE RESPONSE (-db)	POWER RATING, RMS (watts)	COMMENT
			NOTE (1)	NOTE (2)	NOTE (3)	NOTE (4)		
200	18	1.1	965	550	157	-189	300	
200	12	1.45	1265	480	161	-182	300	
200	11	1.7	1900	300	163	-185	600	Dual frequency, 200 & 50 kHz
